**ADJUSTABLE  
GABLES**

**IN SIZES FROM 17 TO 42 INCHES LONG**

**WITH OR WITHOUT  
SUPPORT BARS**

## The Coventry

Available in five sizes. Lengths from 21 inches long to 42 inches long. Pictured above with optional support bars

Sizes available: 21, 26, 31, 36, and 42 inches long. NOTE: support bars add approximately 2 inches to each end.

## The Royal

Available in six sizes. Lengths from 17 inches long to 42 inches long. Available with or without optional support bars. This gable set can be hung in either direction.

Sizes available: 17, 22, 27, 32, 36, and 42 inches long.

All of our optional support bars are 1 3/4 inches wide and detailed with a 45 degree accent edge

## The Dover

Available in three sizes. 27, 36, and 42 inches long. Very popular gable set with a Country Cottage motif.

**NO PITCH MEASUREMENT  
REQUIRED**

## The Bristol

Available in two sizes. 25 or 36 inches long. This gable set was designed for installation in "tight spot" situations where the gable peak is at a sharp angle. Can also be mounted onto optional support bars.

**DROP FINIALS**

## NOTES:

YES - we also produce roof trim

One of the problems homeowners face in putting up a gable set is the determination of the correct fit or *pitch*. We have a video on-line on our website to illustrate the ease of installation using our *adjustable* gable sets. See: [VICTORIAN WOODSHOP GABLES PAGE](#). Taking all the guesswork out of pitch and degree of angle is certainly a plus. The gable sets are designed to be nailed flat onto your existing fascia boards, or with a little more work, hang from the bottom of your fascia boards using support bars. See [video on website](#) for demonstration.

We make gable sets in a variety of sizes allowing a good fit to any roof line or window decoration. They can be installed touching or spread apart to still give a beautiful gable look. This selection of sizes will allow you to use them on various places on your house so they all tie in. If you are looking for a porch bracket to tie into this design, I have several - see [-STANDARD BRACKET PAGE -](#)

As gables are installed exposed into the full sun and weather we construct each piece from high grade external manufactured wood designed exactly for this type of use. Rot, bug, and water resistant. This is a strong manufactured wood designed for outside exterior applications. All gables are shipped primed white and sanded ready to accept paint. In this application I always strongly suggest two coats of good external latex house paint. Please call with any questions or to order gables.

**ALL VICTORIAN GABLE SETS ARE SHIPPED  
SEALED, PRIMED, AND READY TO PAINT**
